Women Safety Analytics – Protecting Women from safety threats.

Background:
- Rising crimes against women demand real-time safety solutions.
- Need for AI-driven surveillance to detect threats early.

How it Works
- Monitors number of men & women in an area.
- Detects anomalies (lone woman at night, unusual gestures, crowd risk).
- Generates alerts to women so that she can act quickly.

Advantages
- Real-time monitoring & early detection.
- Prevents escalation of incidents.
- Identifies crime hotspots for better safety.
- Creates safer public environments.

Key Features
- Person detection & gender classification.
- Lone woman detection at night and crowd risk analysis (woman surrounded by men).
- Unusual gesture recognition and hotspot identification.
- Supports police intervention and builds trust in smart city safety systems.

TECHNICAL APPROACH

SMART INDIA HACKATHON 2025

Methodology (Step-wise Process)

1. Data Collection

Input: CCTV cameras, IoT sensors, microphones.(Capture real-time environment data).

2. AI-Powered Analysis

Person Detection ,Gender Classification → male/female ratio detection.

3. Decision Engine

Evaluates risk thresholds (e.g., lone woman at night + group of men nearby).Classifies as Normal / Suspicious / Threat.

4. Alert Generation

Automatic SOS alerts sent to:Women,Police stations,Registered emergency contacts.

5. Emergency Response

Law enforcement receives live feed+location.Triggers: alarms, lights, drone deployment (future scope).

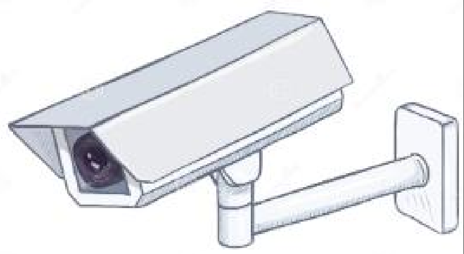
IMPACT AND BENEFITS

SMART INDIA HACKATHON 2025



❖ Potential Impact:

For women in public spaces, workplaces, and institutions equipped with CCTV surveillance, this solution offers:

- **Enhanced Safety & Security** – Real-time monitoring and AI-driven threat detection ensure women feel protected while commuting, working late, or moving in high-risk zones.
- **Quick Emergency Response** – Automatic alerts to guardians reduce response time during potential threats.

❖ Benefits:

- **Crime Reduction:** Proactive threat detection deters harassment, assault, and unsafe activities in public spaces.
- **Improved Public Infrastructure:** Transforms CCTV from passive monitoring to active safety, increasing its social value.
